Matt Fisher | Resume

Open Source Geospatial Research Software Developer - Boulder, CO

Status: Associate Scientist III at National Snow and Ice Data Center (NSIDC)
Field: Geospatial Software & Data Engineering
My website: mfisher87.github.io

mfisher87@gmail.com

orcid.org/0000-0003-3260-5445

Summary

A research software developer passionate about open source, community ownership, accessibility, inclusivity, and education. Open-source software author and maintainer. Core contributor and community manager to *earthaccess*; co-author of *QGreenland*; and co-author and instructor of *QGreenland 2023 Researcher Workshop*, a 3-day hands-on open-source geospatial data best practices workshop that pioneered running the *QGIS* geospatial analysis environment at classroom scale in a cloud-based *JupyterHub*. Certified Software Carpentry instructor.

Experience

Associate Scientist III - National Snow and Ice Data Center (NSIDC) — Apr. 2016 - Present

- NASA Openscapes Mentor - Trained researchers in open source and cloud-ready development practices; developed and presented a lesson on psychological safety to research teams in the NASA Openscapes Champions 2024 cohort; facilitated hackathon events
- Member of strategic working groups: Open Science; Employee Recognition; Employee Learning and Innovation
- Co-founder of discussion groups: Open Science Reading Club; Psychological Safety Discussion Group
- Invited panelist: "Making Arctic Science Open Science" *Navigating the New Arctic* Community Office webinar
- Co-author, co-investigator if funded: NASA ROSES proposal seeking sustainment funding for *earthaccess*
- Co-author: *QGreenland*, a free interdisciplinary Greenland-focused GIS analysis and visualization environment
- Core contributor: QGreenland-Net, a 3-year follow-up collaboration between Arctic Data Center (ADC) and NSIDC which seeks to build an Open Geospatial Data Cloud (OGDC) to improve discoverability, accessibility, and interoperability for geospatial data
- Co-author, co-facilitator: *QGreenland 2023 Researcher Workshop*
- Architect and developer: geospatial database (PostGIS) models and applications
- Architect and developer: graphical data ordering system for NSIDC data
- Developer: data processing pipelines and services for research data including: *Sea Ice Index*, *Images of Antarctic Ice Shelves*
- Developer: geospatial data visualization applications, including *ChArctic*, *Arctic Rain on Snow Study Interactive Map*, *Snow Today*, *Antarctica Today*, Arctic Rain on Snow Study Events Database, and *Greenland Today*
- Improved accessibility and performance of *QGIS* desktop software in cloud-based *JupyterHub* environment; authored a guest post on Jupyter Blog and presented at American Geophysical Union (AGU) 2023 Annual Meeting on this work
- Modernized legacy software and services
- 2022 CIRES Outstanding Performance Award recipient - for high-impact work in science communication

Senior Software Engineer - Discover Financial Services — Jun. 2008 - Apr. 2016

- Developer: distributed systems on IBM AIX/GPFS and z/OS mainframe infrastructure
- Developer: distributed cardmember rewards processing system with dozens of vendor integrations serving >50 million users
- Developer: business tools for configuring unique rewards promotions and analyzing performance
- Extended a proprietary version control system to add branch support
- Designed relational database (Oracle, IBM DB2) models

Open Source Software Developer - Volunteer — 2013 - Present

- Maintainer of *viscm* - A tool for developing mathematically-derived perceptually uniform scientific colormaps
- Contributor to *conda-lock* - A tool that enables reproducibile software environments in the Conda ecosystem
- Core contributor, maintainer, and community manager of *earthaccess* - A library that simplifies searching, downloading, and streaming NASA Earth science data
- Contributor to *Conda Forge* ecosystem and maintainer of conda-forge feedstocks: *earthaccess*, *Quarto*, *viscm*, *pangeo-forge-runner*, *bump-my-version*, *coloraide*, *pdgstaging*, *pdgraster*

Education

Certified Instructor - The Carpentries 2023

Bachelor of Science in Computer Information Systems - Bradley University, Illinois, USA 2005-2009

About me

Skills - Sustainable software engineering, open science, inclusivity, teaching, learning

- FAIR open data principles & CARE indigenous data governance principles
- Psychological safety & inclusive language
- Git & GitHub
- Python, TypeScript, & shell scripting
- Geospatial software and database development
- Software architecture, data modeling, & technical communication
- API design and development
- Linux, containers, Kubernetes, workflow management systems
- Continuous Integration, Delivery, & Deployment
- Collaborative development, "pair/group programming"
- Documentation "deep quality"
- Community management and hackathon facilitation
- Adult education - andragogy; teaching with & administering *JupyterHub*

Career interests - Software communities, open science, collaboration

- Education for researchers - open science, software development, and cloud practices
- Open source software - inclusive and sustainable community engagement
- Developer experience and team/organizational culture

Personal interests - Tech, music, nature

- Playing, recording, developing, and constructing electric and acoustic musical instruments
- Self-hosted services and home automation with Home Assistant
- Plants (especially organic gardening) and animals (especially dogs)
